

INTEGRATED MANAGEMENT SYSTEM POLICY

Euroceras Sp. z o. o. is a European manufacturer of highly specialized synthetic waxes, wax mixtures, modified waxes for many industries. Through our company's activities, we want to meet the highest quality requirements of our clients, guided by the principle of sustainable development, while taking care of the environment and the safety of our employees.

The Management Board undertakes to take actions aimed at improving the quality of manufactured products and continuous improvement of the Integrated Management System based on the requirements of the PN-EN ISO 9001: 2015, PN-EN ISO 14001: 2015 standards and to improve the results in the area of:

- constant product development based on new technologies created in consultation with universities and industry research centres,
- striving to reduce environmental impact by:
 - pollution prevention and its minimization,
 - optimization of raw materials and utilities consumption,
 - proper management of generated waste,
 - improvement of the machine park,
 - using modern pro-ecological solutions,
- process improvement through the use of a risk-based approach and the use of emerging opportunities,
- identification and continuous monitoring of threats and taking all actions to minimize the possibility of adverse events,
- disseminating the awareness that the responsibility for the highest quality and environment rests with every employee of the Company,
- ensuring effective communication and partner relations with clients and interested parties,
- ensuring compliance with legal and other requirements applicable in the Company,
- providing resources necessary to improve employees' qualifications and continuous improvement of the Integrated Management System.

This Integrated Management System policy is known, understood and followed by all Euroceras employees.

The President of Euroceras Sp. z o.o.
Helmut Keim
